DETAILED ACTION

References Cited

1. The applicant's request to remove references Hinde (US006483441B1) and Urai et al. (US006157294A) cited by the Examiner on the PTO-892 mailed 9/21/2004 is denied. Neither reference was applied prior art in a previous rejection, and as such, an appeal to an earlier effective filing date is unavailing. The references are cited as being *relevant* to the applicant's disclosure and will remain in the record.

Reasons for Allowance

2. Claims 21-46 are allowed.

a. Per amended independent claims 21, 28, 32, and 39, the Examiner finds that the claims as now amended are not taught, nor reasonably suggested in combination by the prior art. Specifically, the limitation of manipulating the indicator on the display element to adjust a first distance relative to a reference distance to define a second distance, the first distance being established by a user of the system, wherein the manipulation of the indicator is restricted from effecting an adjustment of the first distance to be less than zero, resulting in the second distance exceeding the reference distance by the first distance, the reference distance being a function of at least a current speed of the vehicle as now claimed, is not taught or reasonably suggested in combination by the prior art. See also applicant's arguments on pages 7-10 of the reply filed 1/3/2005.

Art Unit: 3661

b. Claims 22-27, 29-31, 33-38, and newly added claims 43-46 serve to further define the invention of claims 21, 28, 32, and 39 over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
